Le Cid is a five-act French tragicomedy written by Pierre Corneille, first performed in December 1636 at the Théâtre du Marais in Paris and published the same year. It is based on Guillén de Castro's play Las Mocedades del Cid. Castro's play in turn is based on the legend of El Cid. An enormous popular success, Corneille's Le Cid was the subject of a heated polemic over the norms of dramatic practice known as the Querelle du Cid (Quarrel of The Cid). Cardinal Richelieu's Académie française acknowledged the play's success, but determined that it was defective, in part because it did not respect the classical unities.

Written by the author of the best-selling HyperText & HyperMedia, this book is an excellent guide to the methods of usability engineering. The book provides the tools needed to avoid usability surprises and improve product quality. Step-by-step information on which method to use at various stages during the development lifecycle are included, along with detailed information on how to run a usability test and the unique issues relating to international usability. * Emphasizes cost-effective methods that developers can implement immediately * Instructs readers about which methods to use when, throughout the development lifecycle, which ultimately helps in cost-benefit analysis. * Shows readers how to avoid the four most frequently listed reasons for delay in software projects. * Includes detailed information on how to run a usability test. * Covers unique issues of international usability. * Features an extensive bibliography allowing readers to find additional information. * Written by an internationally renowned expert in the field and the author of the best-selling HyperText & HyperMedia.

The first important fictional treatment of the werewolf theme in English literature, this Victorian thriller traces Wagner's blood-soaked trail through 16th-century Italy in a gothic feast of murder and intrigue.

Editorial Reviews "This series is a MUST READ. " -United Indie Book Blog Synopsis Newly divorced from his greedy and deceptive first wife, Dallas McCray is convinced he wants a sweet country girl like his sister-in-law. So why is he lusting after the new veterinarian in town, striking New Jersey transplant Annie DeSimone? Also divorced, Annie yearns to leave her difficult past behind and start a new life in beautiful Colorado. Sparks fly between her and the handsome Dallas, and happiness finally seems within reach. But attraction and emotion aren't always enough...especially when a man has vowed never to make the same mistake twice.

Learn the art of building robust and powerful recommendation engines using R About This Book Learn to exploit various data mining techniques Understand some of the most popular recommendation techniques This is a step-by-step guide full of real-world examples to help you build and optimize recommendation engines Who This Book Is For If you are a competent developer with some knowledge of machine learning and R, and want to further enhance your skills to build recommendation systems, then this book is for you. What You Will Learn Get to grips with the most important branches of recommendation Understand various data processing and data mining techniques Evaluate and optimize the recommendation algorithms Prepare and structure the data before building models Discover different recommender systems along with their implementation in R Explore various evaluation techniques used in recommender systems Get to know about recommenderlab, an R package, and understand how to

optimize it to build efficient recommendation systems In Detail A recommendation system performs extensive data analysis in order to generate suggestions to its users about what might interest them. R has recently become one of the most popular programming languages for the data analysis. Its structure allows you to interactively explore the data and its modules contain the most cutting-edge techniques thanks to its wide international community. This distinctive feature of the R language makes it a preferred choice for developers who are looking to build recommendation systems. The book will help you understand how to build recommender systems using R. It starts off by explaining the basics of data mining and machine learning. Next, you will be familiarized with how to build and optimize recommender models using R. Following that, you will be given an overview of the most popular recommendation techniques. Finally, you will learn to implement all the concepts you have learned throughout the book to build a recommender system. Style and approach This is a step-by-step guide that will take you through a series of core tasks. Every task is explained in detail with the help of practical examples.

These papers from the 10th anniversary of the Human-Computer Interaction Laboratory (HCIL) at the University of Maryland, exemplify different research methodologies, and show the maturation of human-computer interaction research. The first section introduces how HCIL does what they do.

A collection of stories from the author of *The Blue Book* and *What Becomes* includes tales of man who tries to sell his apartment without renovating the old kitchen and an exploration of the humorous possibilities of fake genitalia. 15,000 first printing.

A guide to building and modifying Tcl scripts to automate network administration tasks Streamline Cisco network administration and save time with Tcl scripting Cisco networking professionals are under relentless pressure to accomplish more, faster, and with fewer resources. The best way to meet this challenge is to automate mundane or repetitive tasks wherever possible. In this book, three Cisco experts show you how to use Tcl scripting for Cisco IOS devices to do just that. You'll learn easy techniques for creating, using, and modifying Tcl scripts that run directly on Cisco network devices from the Cisco IOS command line. The authors first teach basic Tcl commands and concepts for capturing and manipulating data and for querying or controlling Cisco equipment. Building on these core skills, they show you how to write scripts that automate and streamline many common IOS configuration, monitoring, and problem-solving tasks. The authors walk through the entire script development process, including planning and flowcharting what you want to accomplish, formatting your code, adding comments, and troubleshooting script errors. They also present many downloadable sample scripts, along with practical guidance for adapting them to your own environment. Whatever your role in managing, monitoring, or securing Cisco IOS networks and equipment, this book will help you get the job done more rapidly and efficiently. Automate routine administration tasks you've always performed manually Instantly collect and modify IOS router configurations and other data Write Syslog scripts to document failures, monitor network health, collect statistics, and send alarm messages Implement automated network performance measurement using IP SLA Use the Embedded Event Manager's event detectors, server, and policies to customize device operation Trigger preplanned actions to correct problems as they arise Simplify policy management using the Tcl script refresh feature Protect Tcl script security with digital signatures and PKI Understand how Tcl functions within the Cisco IOS environment Master Tcl syntax and commands through hands-on practice Learn best scripting practices through expert examples Quickly modify this
