Big business and state institutions are thriving late in the 21st century thanks to a compliant, stratified and segregated workforce. Hyper-intelligent professionals live in affluence within the metropolis while menials live out in the subsidized, but spartan, enclaves. There are upsides for everyone. Advances in genetic engineering have freed the population from addictive tendencies. Violent crime is a rarity. Mayhew McCline, a corporation that detects global trends, recruits a young woman, Jayna, who instantly becomes the firm's star performer. No one seems to be jealous. After all, she guarantees they all make their bonuses. Despite her flawless track record, Jayna is feeling twitchy. She knows she's making stupid mistakes. But no one has noticed, yet. Working on a hunch that she's too sheltered from real-world unpredictability, she embarks on an experiment to disrupt her proscribed daily routine. Unwittingly, she sets a path that leads to clandestine forays beyond the metropolis, corporate disloyalty and forbidden relationships.

Unlike other American astronauts, Virgil I. "Gus" Grissom never had the chance to publish his memoirs—save for an account of his role in the Gemini program—before the tragic launch pad fire on January 27, 1967, which took his life and those of Edward White and Roger Chaffee. The international prestige of winning the Moon Race cannot be understated, and Grissom played a pivotal and enduring role in securing that legacy for the United States. Indeed, Grissom was first and foremost a Cold Warrior, a member of the first group of Mercury astronauts whose goal it was to beat the Soviet Union to the moon. Drawing on extensive interviews with fellow astronauts, NASA engineers, family members, and friends of Gus Grissom, George Leopold delivers a comprehensive survey of Grissom ' s life that places his career in the context of the Cold War and the history of human spaceflight. Calculated Risk: The Supersonic Life and Times of Gus Grissom adds significantly to our understanding of that tumultuous period in American history. --Publisher
