Aus dem Blickwinkel der Fahrzeugentwickler wird die Technik des neuen Audi Q5 auf ü hrlich und kompetent dargestellt. Baugruppen und Fahrzeugsysteme werden in Funktion und Eigenschaften erkl ä rt, so dass ein technisches Gesamtbild entsteht, das bis ins Detail die faszinierende neue Technik des Kompakt-SUV von Audi erkl ä rt. Garant daß ü r sind die Autoren, die als Ingenieure in Elektronik und Fahrzeugtechnik dieses Auto entwickelt haben.

\*Nanna Verhoeff’s new book is a must for anybody interested in visual culture and media theory. It offers a rich and stimulating theoretical account of the central dimension of our contemporary existence–interfacing and navigating both data and physical world through a variety of screens (game consoles, mobile phones, car interfaces, GPS devices, etc.). In the process of exploring these new screen practices, Verhoeff offers fresh perspectives on many of the key questions in media and new media studies as well as a number of new original theoretical concepts. As the first theoretical manual for the society of mobile screens, this book will become an essential reference for all future investigations of our mobile screen condition.–Lev Manovich.”–Publisher’s description.

The ability to communicate in writing is an essential skill, particularly for nurses at the graduate level. This is a bestselling, comprehensive, and widely used resource on writing for nurse clinicians, graduate students, researchers, and faculty. It covers all types of writing that beginning and experienced nurse-authors may be required or choose to do: E-B research papers, journal articles, book chapters, clinical project findings and innovations, and preparing manuscripts for courses and all types of publication, including open access journals. Brimming with helpful examples, the book takes the reader step-by-step through the entire process of writing, from the generation of an idea through searching the nursing literature, preparing an outline, writing and revising a draft, and onward toward disseminating the finished product. This third edition includes an entirely new chapter on writing articles regarding quality improvement studies, and new information about writing for open access publications. It is also replete with practical examples of the type of writing required for successful DNP capstone projects.

Finite Element Analysis (FEA) has been widely implemented by the automotive industry as a productivity tool for design engineers to reduce both development time and cost. This essential work serves as a guide for FEA as a design tool and addresses the specific needs of design engineers to improve productivity. It provides a clear presentation that will help practitioners to avoid mistakes. Easy to use examples of FEA fundamentals are clearly presented that can be simply applied during the product development process. The FEA process is fully explored in this fundamental and practical approach that includes: Understanding FEA basics Commonly used modeling techniques Application of FEA in the design process Fundamental errors and their effect on the quality of results Hands-on simple and informative exercises This indispensable guide provides design engineers with proven methods to analyze their own work while it is still in the form of easily modifiable CAD models. Simple and informative exercises provide examples for improving the process to deliver quick turnaround times and prompt implementation. This is the latest version of Finite Element Analysis for Design Engineers.

This volume is the newest release in the authoritative series of quantitative estimates of nutrient intakes to be used for planning and assessing diets for healthy people. Dietary Reference Intakes (DRIs) is the newest framework for an expanded approach developed by U.S. and Canadian scientists. This book discusses in detail the role of vitamin C, vitamin E, selenium, and the carotenoids in human physiology and health. For each nutrient the committee presents what is known about how it functions in the human body, which factors may affect how it works, and how the nutrient may be related to chronic disease. Dietary Reference Intakes provides reference intakes, such as Recommended Dietary Allowances (RDAs), for use in planning nutritionally adequate diets for different groups based on age and gender, along with a new reference intake, the Tolerable Upper Intake Level (UL), designed to assist an individual in knowing how much is "too much" of a nutrient.

The experience of modernization -- the dizzying social changes that swept millions of people into the capitalist world -- and modernism in art, literature and architecture are brilliantly integrated in this account.

In 2009, a bipartisan Knight Commission found that while the broadband age is enabling an info. and commun. renaissance, local communities in particular are being unevenly served with critical info. about local issues. Soon after the Knight Commission delivered its findings, the FCC initiated a working group to identify crosscurrent and trend, and make recommendations on how the info. needs of communities can be met in a broadband world. This report by the FCC Working Group on the Info. Needs of Communities addresses the rapidly changing media landscape in a broadband age. Contents: Media Landscape; The Policy and Regulatory Landscape; Recommendations. Charts and tables. This is a print on demand report.
