Fortunately, scalability and simplicity are not mutually exclusive rather than using some trendy technology, a different approach is needed. Big data systems use many machines working in parallel to store and process data, which introduces fundamental challenges unfamiliar to most ...

Big Data | Guide books

Nathan Marz is the man behind Apache Storm, and he also invented the Lambda Architecture Model for big data systems, so it's no surprise that this book, which has the subtitle "Principles and best practices of scalable real-time data systems" is in fact an in-depth look at how you can use the Lambda architecture model (LAM) for managing big data. The idea behind LAM is that big data databases are too large to manage and query in real time, so you split them into a
