Clothing is everything your students want to know about fashion, fabrics, & construction!

"Clothing, fashion, fabrics & construction is a comprehensive program that prepares students to make more informed decisions when buying and caring for clothes or examininf career options." (publisher).

Apparel-Design, Textiles & Construction is designed to help students understand the role of apparel in their lives and the lives of others. Students will learn about the textile and apparel industry from the U.S. and global viewpoint, the latest trends in fashion and apparel, the impact of fashion design on the industry, and a focus on career opportunities in textiles and apparel. In addition, students will also learn how to make the best decisions regarding the selection and care of apparel and how to construct apparel. This new edition also includes the following: • New chapters on fashion design and entrepreneurship. • Updated information on the textile industry, online shopping trends, apparel care products and equipment, and redesigning and recycling apparel. • Emphasis on the elements and principles of design as they relate to apparel. • Discussion on the cultural, societal, environmental, economic, and technological influences on textiles and apparel. • A wealth of chapter review materials-Think Critically, Apparel Applications, Academic Connections, Workplace Links, and FCCLA-that help students apply text concepts.

Swatch Reference Guide for Fashion Fabrics is an all-in-one text and swatch book that focuses on the unique needs of students in fashion design, apparel merchandising, and product development.

In May 1991, journalists, news crews, and human rights activists from around the world gathered in front of Pretoria's notorious Central Prison to watch the release of 14 black South Africans from Death Row. Upington is their story. It is also the story of their fellow accused and the young white woman who became

their lawyer. It tells of a country undergoing vast change and the painful process of reconciliation with a savage past. It unravels a trial of personal and political complexity that ends in the assassination of one of the defence lawyers and the eventual exile of another to Australia, a country coming to terms with its own history. Upington triggers the excavation of a private life and reveals the inextricable link between personal and political transformation, the challenge of choice and the ultimate resolution that comes with 'doing time.'

This easily navigable resource provides over 125 swatches of the most recognized and widely used varieties of fabric, including natural fabrics such as cottons, silks, wools, and linens as well as artificial and synthetic fabrics like acetates, lyocells, nylons, and metallics to encourage consideration of not just the aesthetic appeal of various fabrics but also their structure, feel, and weight. Bound into a hardcover book, with descriptions and contextual illustrations alongside them, the fabrics are in their raw state, before bleaching, dying, or finishing, so that their properties can be observed without the distraction of color or pattern. With information on fibers, basic construction of fabrics, weights, construction, and weave comparison, the book will help student fashion designers to make informed textile choices based upon an understanding of raw materials together with the processes that make up a fabric. A useful glossary defines key terminology. The book will be useful for anyone who works with fabrics and is the ideal companion to the Fabric for Fashion book.

Construction is the foundation of fashion design; it takes passion and great skill to turn a two-dimensional drawing into a successful garment. Construction for Fashion Design guides readers through the process, teaching the theory, practical skills and techniques that they need to succeed. It leads readers through the essential stages of creating a garment, from pattern cutting and draping on the mannequin to sewing techniques and haberdashery. This fully revised and expanded second edition features insightful case studies with leading creative practitioners at the cutting edge of the fashion industry today, complete with detailed, step-by-step exercises that enable readers to contextualise their knowledge and put it into practise for the creation of their own successful projects.

Textiles and Fashion explores the art of creating fashion textiles, from practical processes including fibre production, dyeing and finishing, to construction techniques such as weaving and knitting.
