Worry about cholesterol. Avoid red meat. Eat whole grains. Could it all be a lie? We live in an era of health hype and nutrition propaganda, and we’re suffering for it. Decades of avoiding egg yolks, choosing margarine over butter, and replacing the real foods of our ancestors with low-fat, processed, packaged substitutes have left us with an obesity epidemic, ever-rising rates of chronic disease, and, above all, total confusion about what to eat and why. This is a tragedy of misinformation, food industry shenanigans, and cheap calories disguised as health food. It turns out that everything we’ve been told about how to eat is wrong. Fat and cholesterol are harmful to your health? Nope—they are crucial to your health. “Whole grains” are health food? Not even close. Counting calories is the way to lose weight? Not gonna work—nutrients are what matter. Nutrition can come from a box, bag, or capsule? Don’t count on it! In *Eat the Yolks*, Liz Wolfe debunks all these myths and more, revealing what’s behind the lies and bringing the truth about fat, cholesterol, protein, and carbs to light. You’ll be amazed at the tall tales we’ve been told in the name of “healthy eating.” With wit and grace, Wolfe makes a compelling argument for a diet based on Paleo foods. . . . fat and cholesterol are crucial, not harmful . . . and why
- “whole grains” are processed foods . . . and what to eat instead
- counting calories is a waste of energy . . . and what we actually should be tracking
- all animal products are not created equal . . . and which ones we truly need

“Before he earned his third Michelin star at his iconic restaurant, Le Bernardin, the James Beard Award for Outstanding Chef of the Year, became a regular guest judge on Bravo’s Top Chef, even before he knew how to make a proper omelet, Eric Ripert was a young boy in the South of France who felt that his world had come to an end. At the age of five, his parents went through a bitter divorce. Eric moved away with his mother, whose new husband, Serge, quickly grew to resent Eric and seemed to delight in making him miserable. The only place Eric felt at home was the kitchen, where his mother tried to cheer him up with lavish meals, but once the plates had been cleared, his unhappiness returned. Then he met Jacques, a locally renowned chef and restaurant owner. Jacques took Eric under his wing, letting him into his kitchen everyday after school where he would teach Eric how to make real chocolate mousse and regale him with stories from his travels. Watching Jacques and the obvious pride he took in his work, Eric began to see a future for himself, one in which his lifelong love of food could become something that he shared with other people. His desire to not only cook but to become the best would lead him into some of the most celebrated and demanding kitchens in Paris, serving under legendary chefs like Joel Robuchon and Jean Louis Palladin and trying to survive the brutal, exacting environment of their kitchens. Like Jacques Pepin’s classic memoir *The Apprentice*, Eric Ripert’s is a coming of age story about how he learned to cook and finally found his place in the kitchen!”-

When is the right time of day to eat that chocolate chip cookie? And would you actually drink that glass of water if it meant skipping the gym? This revolutionary guide reveals how to use food to enhance our personal and professional lives--and increase longevity to boot. What to Eat When is not a diet book. Instead, acclaimed livernist Michael Roizen and preventive medicine specialist Michael Crupain offer readers choices that benefit them the most--whether it’s meals to help them look and feel younger or snacks that prevent diseases--based on the science that governs them.

North Americans are some of the least healthy people on Earth. Despite advanced medical care and one of the highest standards of living in the world, one in three Americans will be diagnosed with cancer in their lifetime, and 50 percent of US children are overweight. This crisis in personal health is largely the result of chronically poor dietary and lifestyle choices. In *Whitewash*, nutritionist Joseph Keon unvels how North Americans unwittingly sabotage their health every day by drinking milk, and he shows that our obsession with calcium is unwarranted. Citing scientific literature, *Whitewash* builds an unassailable case that not only is milk unnecessary for human health, its inclusion in the diet may increase the risk of serious diseases including: Prostate, breast, and ovarian cancers Osteoporosis Diabetes Vascular disease Crohn’s disease Many of America’s dairy herds contain sick and immunocompromised animals whose tainted milk regularly makes it to market. Cow’s milk is also a sink for environmental contaminants and has been found to contain traces of pesticides, dioxins, PCBs, rocket fuel, and even radioactive isotopes. *Whitewash* offers a completely fresh, candid, and comprehensively documented look behind dairy’s deceptively green pastures and gives readers a hopeful picture of life after milk. Joseph Keon has been a wellness consultant and nutrition and fitness expert for over twenty-five years. He is considered a leading authority on public health and has written three books, including *Whole Health: The Guide to Wellness of Body and Mind* and *The Truth About Breast Cancer*.
