A concise, insightful guide to foot and ankle surgeries from master orthopaedic foot and ankle surgeon Steven Raikin Foot and ankle problems such as injuries, arthritis, congenital and acquired deformities, tendinopathies, heel pain, and nerve damage account for a large percentage of orthopaedic conditions. A better understanding of the biomechanics of the foot and ankle and improved outcome research have led to considerable advances in foot surgery techniques, superior results, and improved

functional outcomes. *Foot and Ankle Surgery: Tricks of the Trade* by renowned foot and ankle specialist Steven Raikin and experts from 12 countries, presents step-by-step guidance on the latest foot and ankle surgery procedures. Each succinct, consistently organized chapter takes the reader from patient assessment, diagnostic evaluations and patient selection to surgical planning and positioning, the procedure itself, how to handle complications, postoperative management, and the authors' pearls and surgical tips. The book is divided into forefoot, midfoot, hindfoot, nerve, and ankle pathologies, encompassing commonly performed reconstructive and traumatic procedures. Different techniques are discussed for similar pathologies, such as open and arthroscopic lateral ankle ligament reconstruction, and augmentation options utilizing tendon allograft or an internal brace. **Key Features** Discussion of six different total ankle replacement systems, many written by designers of the systems themselves, affords unique insights A full spectrum of techniques to correct plantar plate tears, hallux valgus, tarsal tunnel syndrome, drop-foot, midfoot arthritis and deformity, tibial tendon dysfunction, Achilles rupture, osteochondral lesions of the talus, ankle fractures, and more Tricks and pearls for optimizing procedural performance, managing hazards and pitfalls, and preventing or resolving intraoperative complications A mix of 500 high quality artist illustrations and intraoperative photographs delineate anatomy and procedures This highly practical book provides a robust teaching tool for orthopaedic procedures of the foot and ankle. Orthopaedic residents, foot and ankle surgeons, and podiatrists will benefit from clinical pearls and tips from top experts who made major significant contributions to this subspecialty.

This comprehensive textbook brings together a unique vision and multidisciplinary approach – embracing and combining MD, DO and DPM foot and ankle training disciplines – into a singular focus on improving and mastering surgical treatment of foot and ankle disorders. It opens with a chapter presenting the specific preoperative considerations and protocols commonly followed by foot and ankle surgeons of all specialties. Divided into three main thematic sections detailing the forefoot, midfoot and hindfoot, each subsequent chapter follows a consistent chapter format presenting case examples, key surgical set-up and equipment needs and step-by-step clinical pearls for surgical excellence. Post-operative care and rehabilitation recommendations are also included for a well-rounded presentation of care from start to finish. Both common and complex pathologies and injuries are discussed, from bunion and hammertoe management to the Charcot foot and ankle, total ankle replacement, arthroscopy and arthroplasty techniques, amputations and biologics. Generous figures and intraoperative photos illustrate the procedures in vivid detail. The subspecialty of foot and ankle surgery is a highly specialized one, which is constantly evolving and improving. This speaks to the complexity of the foot and ankle complex, the multiple levels and articulations of the foot and the variety of pathologies encountered. This textbook leans on the unique experience and training of the OFAC attending surgeons and past fellows to reveal the pearls and keys to the efficient surgical treatment of the full gamut of foot and ankle pathologies. Ideally suited for residents and students whether MD, DO or DPM, *Essential Foot and Ankle Surgical Techniques - EFAST* for short - is a dynamic, multidisciplinary resource that covers the full range of pathologies and injuries an orthopedic surgeon or podiatrist would encounter in daily practice.
