DIESEL ENGINE CONTROL SYSTEMS

Oil temp is running way too hot. 250 plus when loaded. Truck is not being used until this is resolved. The rad was replaced a month ago and coolant temp rarley goes above 195. Stays about 180 most of the time. The oil temp sensor, oil cooler and oil thermostat have all been replaced since the problem started. I'm completely baffled. Please help.

Cummins ISX High Oil Temp! | TruckersReport.com Trucking ...

Fuel oil flash point is to be high because if it is low, there would be a possibility of fire in storage. Engine crankcase lubricating oil flash point should be as high as possible to prevent crankcase explosion. For safe storage, oil storage tank heating temperature to be limited to at least 14°C lower than flash point to prevent fire.

High Engine Oil Temp 3516 - dev.destinystatus.com

Specifications. Benefits & Features. Equipment. The 3516B marine propulsion engine includes the Advanced Diesel Engine Management System II, Control Monitoring Protection System, Customer Communication Module, and Digital Voltage Regulator. Benefits include improved fuel economy, reduced visible and gaseous emissions, enhanced diagnostic and monitoring capabilities, and increased rated output with no reduction in reliability.

Cat 3516B Marine Propulsion Engine | Finning CAT

High Temp Plus 600G can be applied manually or automatically, by spraying, dosing, brushing, wiping or by drip oiler. High Temp Plus 600G can be used up to 280°C as a high temperature oil for circulation or total loss oil applications and at higher temperatures where adequate re-lubrication is provided.

High Temp Oil 600G | High Temperature Chain Lubricant ...

TURBONYCOIL 3516 is used by major MROs as engine preservation oil at the end of maintenance tasks or during aircraft storage. It retains low viscosity at very low temperature (down to -60°C), and is therefore an efficient oil for the cold parts of A/C engines and airframes. It can also be used as a multi-purpose lubricant for many aircraft parts.
