SlideShare **Endocrinology**

Introduction •

Endocrinology is the understanding of hormone secretion, hormone action, and principles of feedback control. • The endocrine system is evaluated primarily by measuring hormone concentrations. •

Most disorders of the

Download File

PDF Insect

Endocrine system are amenable to effective treatment once the correct diagnosis is determined. 4.

Lecture 15: Endocrine & Exocrine glands in insects

In insects, neurosecretory cells are numerous and have important functions. Recent work has revealed

Download File

PDF Insect

that there are two types of neurosecretory cells: type A which stain with para-aldehyde fuchsin, and type B which do not. All cells possess electron dense granules.

Endocrine Glands in
Insects - Zoology
Notes

Once an insect

Page 29/41

Download File

PDF Insect

reaches the adult stage, its prothoracic glands atrophy (wither away) and it will never molt again. Prothoracic glands produce and release ecdysteroids only after they have been stimulated by another chemical messenger, prothoracicotrophic hormone (PTTH for short).
