International La Engine Serial Numbers. International Engine Serial Number Location. The International Harvester Company (IHC) has been building its own proprietary truck engines since the introduction of their first truck in 1907. International tended to use proprietary diesel engines. In the 1970s, IHC built the DVT 573 V-8 diesel of 240 and 260 hp (179 and 194 kW) but these were not highly regarded and relatively few were sold.

Trucks were generally built in serial number order, but not exactly for numerous reasons. Example: 781956G200123 For the 1973 model year, the VIN was modified to consist of a 5 character model code, followed by a letter indicating the model year of production, the plant indicator, a production line within the plant indicator, and a 5 digit serial number that started with 10001 each year.

Navistar Engine Serial Number Format. Navistar uses a standard format for their engine serial numbers, which is incredibly helpful for giving information about the engine. The first three (or four, in some cases) digits indicate the engine model. For example, 466 or 570H. The number after the engine model indicates the configuration; B is for turbo JWAC, D is for naturally aspirated, G is for turbo air to air, H is for HEUI, and T is for turbo engines. The next number and letter combination ...

The GRD-214 and 233, along with the RD-372, 406, 450 and 501 are on the driver's side of the block, just below the head. The BLD series engines have a cast insignia on the left rear side behind the oil filter housing. The engine number "BLD xxxx" is stamped on a raised boss on the left front side of the block.

Identifying an IH engine | OldIHC

The VIN code is the vehicle identification number, which is a unique serial number. It is used to identify trucks around the world. Decryption of VIN, especially if it's a free option is a very important thing for a modern driver. To find out the characteristics of the car, if there are several variants of models is quite problematic.
