While still an old  
Transponder, it offers  
better reliability than  
either the AT-50 or AT-50A.  
The AT-150 combines a solid  
state design with high power  
output. The AT-150 may be  
used up to 30,000 feet, and  
its 250 watts of  
transmission power provide a  
range of 200 miles (via line  
of sight).

While planning to purchase an ADS-B transponder in the near future, I'm wondering if the Narco AT150 model transponder is a slide-in replacement for the older AT50 unit? I have a couple of used AT150s and trying to determine if they could be used to replace a defective AT50. Anybody have experience with this scenario? Rob58, Nov 30, 2017 #1.
