passages: a crossing of the Atlantic Ocean, a trip from the East Coast of the U.S.A. to the Caribbean, and cruising around the Caribbean itself.

The Global Maritime Distress and Safety System (GMDSS) provides a fast and efficient way of calling for assistance at sea, whatever the size of craft or geographical position. Now updated for the fourth edition, this book explains the operation of the system as a whole and the procedures involved, as well as covering the syllabi of the General Operator's Certificate (GOC), the Long

(DVB-RCS) standards and Aeronautical Stratospheric Platform Systems (SPS) and networks.

The Reed's VHF DSC Handbook is a user-friendly guide that gets marine VHF radio users quickly up to speed with both the analogue and digital functions on the radio. Sue Fletcher's straightforward explanations and tips describe the leisure craft VHF DSC radio system in detail and its place within GMDSS. Since it was first published it has become the standard work on the subject. Updated to take into account new developments and procedures

it provides: all the information required to pass the Short Range Certificate (SRC) - which is compulsory for anyone using a VHF DSC radio; radio procedure, channel allocation, VHF radio theory and more; a full explanation of GMDSS, including details on EPIRBs, SARTs and Navtex; an invaluable onboard reference. The rescue authorities and commercial maritime world now rely almost entirely on DSC for initial contact, so if you need help and want to be heard, a marine VHF DSC radio is essential. 'If you are looking for just one book to explain all marine
