Spradley should be read by anyone who wants to gain a true understanding of the process of participant observation. This text is a follow-up to his ethnographic research handbook, *The Ethnographic Interview*, and guides readers through the technique of participant observation to research ethnography and culture. Spradley shows how to analyze collected data and to write an ethnography. The appendices include research questions and writing tasks.

The Cultural Experience has helped generations of undergraduates discover the excitement of ethnographic research through participation in relatively familiar cultures in North American society. Grounded in the interviewing-based ethnographic technique known as ethnosemantics, the latest edition continues to treat ethnography as a discovery process. Students are taught how to set up an ethnographic field

study, choose a microculture, and find and approach an informant, as well as how to ask ethnographic questions, record data, and organize and analyze what they have learned. Detailed instruction on how to write an ethnography is also provided. The guidelines are followed by ten short but substantive, well-written student ethnographies on such microcultures as exotic dancing, firefighting, pest extermination, and the work of midwives and police detectives. The Second Edition of this popular classroom volume includes boxed inserts that offer suggestions to aid in the research process, material on how to use observation and narratives with the ethnosemantic approach, an emphasis on how to find cultural themes and adaptive challenges by analyzing ethnographic field data, and extensive strategies for writing the final ethnographic paper. It also presents a comprehensive treatment of ethical responsibilities as well as a discussion of the significance of ethnographic research and its applications in the workplace.

As the image of anthropologists exploring exotic locales and filling in blanks on the map has faded, the idea that cultural anthropology has much to say about the contemporary world has likewise diminished. In an increasingly smaller world, how can anthropology help us to tackle the concerns of a global society? David A. Westbrook argues that the traditional tool of the cultural

anthropologist—ethnography—can still function as an intellectually exciting way to understand our interconnected, yet mysterious worlds. Navigators of the Contemporary describes the changing nature of ethnography as anthropologists use it to analyze places closer to home. Westbrook maintains that a conversational style of ethnography can help us look beyond our assumptions and gain new insight into arenas of contemporary life such as corporations, financial institutions, science, the military, and religion. Westbrook's witty, absorbing book is a friendly challenge to anthropologists to shed light on the present and join broader streams of intellectual life. And for those outside the discipline, his inspiring vision of ethnography opens up the prospect of understanding our own world in much greater depth.

Recruited to be a lecturer on a group tour of Indonesia, Edward M. Bruner decided to make the tourists aware of tourism itself. He photographed tourists photographing Indonesians, asking the group how they felt having their pictures taken without their permission. After a dance performance, Bruner explained to the group that the exhibition was not traditional, but instead had been set up specifically for tourists. His efforts to induce reflexivity led to conflict with the tour company, which wanted the displays to be viewed as replicas of

culture and to remain unexamined. Although Bruner was eventually fired, the experience became part of a sustained exploration of tourist performances, narratives, and practices. Synthesizing more than twenty years of research in cultural tourism, *Culture on Tour* analyzes a remarkable variety of tourist productions, ranging from safari excursions in Kenya and dance dramas in Bali to an Abraham Lincoln heritage site in Illinois. Bruner examines each site in all its particularity, taking account of global and local factors, as well as the multiple perspectives of the various actors—the tourists, the producers, the locals, and even the anthropologist himself. The collection will be essential to those in the field as well as to readers interested in globalization and travel.

Interpretative Qualitative Research: Agency, Subjectivity, and Experience frames the concerns and processes of standard analytic induction, ethnomethodology, and symbolic interaction in terms of cutting-edge issues for contemporary qualitative research. It is the first book to demonstrate how interpretive paradigms for qualitative data analysis produce research findings that are rooted to significantly different understandings of personal agency and social structures; subjectivity and identity; and, the nature of human experience. Specifically, the book explores the analytical process,

interpretative power, and political effects of these three styles of interpretative research. The result is a rich, pedagogical resource that explores not only how data is interpreted but also the kinds of problems, solutions, and questions that can be investigated.

Negotiating Cultures and Identities examines issues, methods, and models for doing life history research with individual Americans based on interviews and participant observation. John L. Caughey helps students and other researchers explore the ways in which contemporary Americans are influenced by multiple cultural traditions, including ethnic, religious, and occupational frames of reference. Using the example of Salma, a bicultural woman of Pakistani descent who lives in the United States, and the story of Gina, a multicultural American, Caughey examines how to capture the complexity of each situation, including step-by-step methods and exercises that lead the student interviewer through the process of locating and interviewing a research participant, making sense of the material obtained, and writing a cultural portrait. Arguing that comparison between the subject's life and one's own is an essential part of the process, the methodology also encourages the investigator to research his or her own social and cultural orientations along the way and to contrast these with those of the subject. The book offers a practical,

manageable, and engaging form of qualitative research. It prepares the student to do grounded, experiential work outside the classroom and to explore important issues in contemporary American society, including ethnicity, race, identity, disability, gender, class, occupation, religion, and spirituality as they are culturally understood and experienced in the lives of individual Americans.

A 1975 classic, this highly readable, in-depth study examines a familiar female role in contemporary American society. The authors apply fieldwork methods to the study of social behavior in a college baras viewed from the perspective of cocktail waitresses. They describe in detail the day-to-day lives of women and the meaning of work for women in a mans world. Not a feminist tract, their book provides a wealth of empirical data on the nature of being female in our culture. The Cocktail Waitress examines female/male relationships as well as patterns of male dominance in social interaction, and shows how these are linked to more general issues in anthropology. The work teaches important social science concepts while always dealing with the college students own world. Its objective presentation of the waitress casts light on significant social issues and the role of women in todays society, together with the manner in which female-male roles are interlocked.

Helping ethnographers devise a clearly articulated explanation of their methods, this book argues that norms about discussing methods in ethnographies are underdeveloped. The book considers what ought to be normative in methods discussions within ethnography - from the research design to the end product.
