Many people don't know that there is an actual alternative to the XLSX and XLSM file type: The XLSB file extension. XLSB files store the data a little bit different than the XLSX or XLSM file types: They don't use the XLM file structure. Instead, XLSB files try to save disk space because the data is stored in the binary structure.

For this exercise, I am going to show you how to convert an Excel workbook from the .xls file format to the latest .xlsx format. Be aware that it is not as easy as renaming the file to include the X on the end of the extension, you need to use the Conversion tool included in the Office programs for the conversion to be successful.
