Retrieves uploads directory information. Description # Description. Same as wp_upload_dir() but "light weight" as it doesn't attempt to create the uploads directory. Intended for use in themes, when only `base_dir` and `base_url` are needed, generally in all cases when not uploading files.

~~wp_get_upload_dir() | Function | WordPress Developer Resources~~

First, connect to your website via FTP and then go to /wp-content/ folder. Inside, you'll find the uploads folder, which is where WordPress stores all your media uploads including images. Now right click on the uploads directory and then select File Permissions. This will bring up the file permissions dialog box.
